

THE INVENTOR CLAIMS:

1. An applicator for the applying of lubricant to bowling  
2 shoe soles and the like, comprising:

a body of said lubricant having a generally planar  
4 application surface area, and

holder means attached to said body of lubricant means.

2. An applicator according to Claim 1, wherein said  
2 lubricant comprises soapstone.

3. An applicator according to Claim 2, wherein said  
2 soapstone comprises talc, chlorite, and magnetite.

4. An applicator according to Claim 1, wherein said holder  
2 means comprises a handle having at least one groove for manual  
grasping for use.

5. An applicator according to Claim 1, wherein said holder  
2 means has a generally rectilinear block configuration.

6. An applicator according to Claim 2, wherein said holder  
2 means has a generally rectilinear block configuration.

7. An applicator according to Claim 1, wherein said holder  
2 is of generally cylindrical configuration and said block of  
lubricant is disposed therein and extends therefrom.

8. An applicator according to Claim 2, wherein said holder  
2 is of generally cylindrical configuration and said block of  
lubricant is disposed therein and extends therefrom.
